Projects

Fragrance-universe-website (Full-stack)

[FrontEndCodes](#) || [BackendCodes](#) || [LiveLink](#)

- Responsive MERN Stack project with firebase authentication, admin authentication, persistent login, and dashboard functionality for users and admin.
- Logged in users will see a button named "Dashboard", where they can view the booked list which they have requested. If the logged in user is an Admin, they will be having a couple of extra features called "Add Product" & "Make Admin".
- Users can give reviews and admin has the power to remove reviews if needed.

Technologies used: React, JavaScript, TailwindCSS, Firebase Authentication, NodeJs, ExpressJs, MongoDB, Heroku.

Order-For-Foodie(Full-stack)

[FrontEndCodes](#) || [BackendCodes](#) || [LiveLink](#)

- Responsive MERN Stack project with Google login.
- User can order and manage it, but this process has to be through logging in.
- User will be able to see their name and image on the navbar.

Technologies used: React, JavaScript, TailwindCSS, Firebase Authentication, NodeJs, ExpressJs, MongoDB, Heroku.

Healthcare-Website

[FrontEndCodes](#) || [LiveLink](#)

- Responsive project with Google login.
- Sign-in is required for taking any service.
- User will be able to see their name and image on the navbar.

Technologies used: React, JavaScript, TailwindCSS, Firebase Authentication.

Languages

Fluent in both Bangla & English.
